Agricultural Projects & Practices ➤ Cropland Water Savings

The CREP acres enrolled in Minidoka county aid in reducing consumptive use of groundwater on cropland in the Eastern Snake River Plain. Some contracts are physically located in neighboring counties but administered thru the Minidoka FSA office. ISWCC staff work with each participant to prepare conservation and seeding plans for establishing and maintaining conservation cover for the 15 year contract period. In FY 2019, there are currently 64 active contracts on 4,808 acres.

Key Accomplishments/expenditures are cumulative amounts. See the aggregated CREP project listed under "Conservation Reserve Enhancement Aggregated from 2006 - 2019

(CREP)" for a breakdown of all program funding.

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
